EDUCATION

C# Web Developer

Software University

09/2021 - 04/2024

Sofia, Bulgaria

Courses

- **C# Advanced and OOP** : Focus on linear, multidimensional, and associative data structures, basic algorithms, functional programming, OOP principles, Reflection API, and Unit Testing.
- **C# Databases** : Fundamentals of relational and NoSQL databases, SQL, CRUD operations, database schema design, ORM mapping, Entity Framework, LINQ, XML, and JSON.
- **C# Web Development** : Creating Web applications with ASP.NET MVC, working with HTTP protocol, MVC pattern, authentication, filters, middleware, Web APIs, RESTful backends, testing, and deployment.
- **DevOps** : Linux shell, containers (Docker, Docker Compose), DevOps monitoring tools, CI/CD pipelines, Git, GitHub, cloud deployment, and automated testing and deployment.

Application Programmer

PPMG Nikola Obreshkov

09/2019 - 05/2024

Kazanlak, Bulgaria

Courses

- **Algorithmic and Programming Skills** : Synthesis and analysis of algorithms, various programming paradigms (algorithmic, structural, OOP, component, and functional) with Haskell, understanding of computer architectures, hardware, and operating systems.
- **Design and IT Activities** : Web Design (Figma, Canva), construction, programming, production-research, and organizational-management in IT and computer science.
- **Mathematics in Programming** : Applied mathematics using C#.
- **Electronics Projects** : Working with Arduino.

Computer engineer

Technical University Sofia, branch Plovdiv

09/2024 - Present

Plovdiv, Bulgaria

Courses

- **Computer Systems and Architecture**: Study of microprocessor systems, embedded systems, and digital logic design.
- **Operating Systems and Networks**: Focus on operating systems, memory management, process scheduling, and computer networks.
- **Artificial Intelligence and Big Data**: Introduction to AI, machine learning, and data analysis in Big Data environments.

TECHNICAL SKILLS

C#

JavaScript

HTML & CSS

Git/GitHub

MS/SQL - TSQL

ASP.NET MVC

Web APIs

RESTful APIs

PERSONAL PROJECTS

Car Rental System (07/2023 - 08/2023) [🔗](#)

- **Overview** : A simple web application for car rentals.
- **Technologies** : C#, ASP.NET MVC, SQL Server, EF Core.
- **Features** : User registration and login. Browse and view detailed car information. Make reservations. Admin panel for managing car listings, reservations, and users. Blog area for user posts and information sharing.

Job Finder System (12/2023 - 04/2024) [🔗](#)

- **Description** : School graduate web project focused on job searching, implemented in C# with ASP.NET MVC, SQL Server, EF Core, and MVC pattern.
- **Key Features** : User authentication for companies, job seekers, and administrators. User interactions: browsing job offers, submitting applications, and saving job listings. Company management: CRUD operations for job offers and profile editing.
- **Advanced features** : rich text job descriptions and multi-select tag suggester. Administrator access for comprehensive site management. Search functionality: dynamic filtering and keyword search. Contact page for direct messaging to the administrator.
