

Hristian Ivanov

.NET Developer

Plovdiv, Bulgaria | +359 89 596 8391 | hristianivanoww@gmail.com | [LinkedIn](#) | [GitHub](#)

Skills

- **Backend:** C#, ASP.NET Core, Entity Framework Core
- **Frontend:** React, Typescript, JavaScript, Tailwind CSS
- **Database:** PostgreSQL, SQL Server
- Experience with **Web applications**, **RESTful APIs**, **RDBMS**
- Good understanding of **OOP & SOLID**, **Data structures & algorithms**
- Fluent **English** speaker

Education

Bachelor of Computer Engineering | Technical University Sofia | 2024 – now

C# Web Developer | Software University Sofia | 2021 – 2024

Application Programmer | PPMG Nikola Obreshkov Kazanlak | 2019 - 2024

Projects

Wild Rift Counter Lab

 [GitHub](#) /  [Live Demo](#)

- **Full-Stack AI-Powered** Recommendation Platform
- Built and **deployed a full-stack** recommendation platform using **ASP.NET Core, React, PostgreSQL, Railway, Vercel, and Supabase**
- Designed a deterministic **scoring engine** that evaluates lane matchup, team profile, role fit, safety, scaling, utility, damage profile, draft needs, and counter threats
- Integrated **Groq AI** for **real-time champion recommendation explanations** while keeping deterministic scoring logic
- Implemented **Clean Architecture** with API, Application, Domain, and Infrastructure layers, improving maintainability and testability
- Added champion and matchup-rule management **APIs**, validation, **standardized error responses**, Swagger documentation, and added **60+ automated tests** covering business rules, validation, and API behavior

DevHunter
